

**Needle-and-Thread / Soapweed Yucca Herbaceous Vegetation (Map Code 3.1)**

*Location:* This type is common in the sandhills portion of the Refuge, usually on gently rolling sandy soils.

*Photo Signature:* Color is a lighter brown than class 2.2 Soapweed yucca / Needle-and-Thread and darker than class 2.1 Soapweed yucca (sparse understory), and more stippled than map class 3.3 Needle-and-Thread – Sunsedg Herbaceous Vegetation. Small spackles of white are common.
