

W-CHIN *Melia azedarach* Woodland Stand
Chinaberry Woodland Stand

Associations and Alliances

Local Stand (no NVC Alliance at this time)

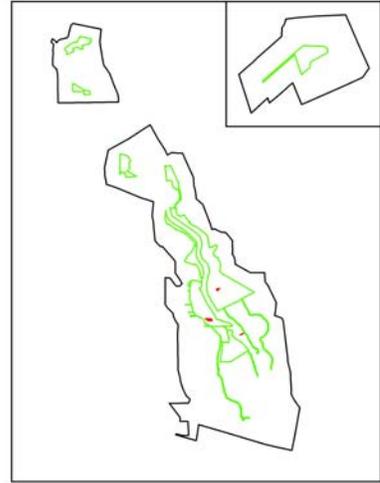

Common Species

- Melia azedarach*
- Carya illinoensis*
- Celtis laevigata*
- Acer negundo*
- Cornus drummondii*
- Rubus riograndis*
- Toxicodendron radicans*

Description

Chinaberry trees were found throughout the river and channel bottoms in and surrounding the Missions unit. Only a few mappable stands were observed in the park but smaller, isolated patches may also exist. Since this is an exotic species, removal efforts may dramatically effect its distribution over time. On the color infrared imagery this type appeared as bright pink trees intermixed with other deciduous trees.
