

UR - Residential

The Residential Map Unit (UR) represents the Residential Level II Class. For this mapping project, it includes lands used primarily for residential use. They consist of residential homes in populated areas and of homesteads in rural settings but are not part of farmsteads. Although most polygons mapped as UR are outside the park boundary, a few are found within.

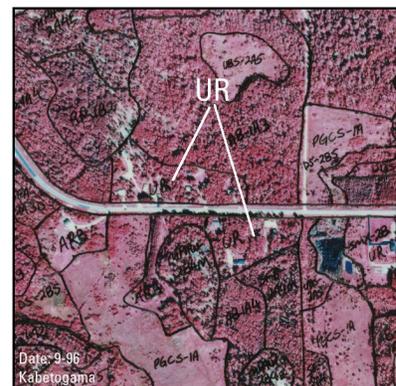

UR in this photo appears as several scattered houses along the bay. Smooth pink lawns and scattered trees are visible.

UR appears as scattered houses, lawns, and small wooded areas between residences. White roads are also visible.

UR appears as a residential area along either side of a road.

Area Report for UR Map Unit

Polygons: 179

Hectares: 269

Acres: 664

Average size: 2 hectares, 4 acres

Land Use/Land Cover Classification Hierarchy for UR Map Unit

LEVEL I Urban or Built-up Land (1)

LEVEL II Residential (11)
